HiveRadar Inc.

About Us

We are a boutique IT Security and Network Solutions company formed in 2003. With a company ethos focused on trustworthy, reliable & effective products, we have continued to work with vendors that are agile, responsive, & adaptive to the ever-changing market. Simply put, we offer solutions that improve your business and security. We like to say we “eat our own dog food” because every solution we recommend and sell has passed muster with us. Since our humble beginnings, we have amassed over 4500 clients across Canada and we continue to grow daily. Still interested? Here's a brief snapshot of what we bring to the table.

What we bring to the table

(In alphabetical order)

Barracuda

IT Security

Barracuda Networks provides access to cloud-enabled, enterprise-grade security solutions that are easy to buy, deploy, and use. They protect email, networks, data, and applications with innovative solutions that grow and adapt with your journey.

Bitwarden

Password Management

Bitwarden is the password management solution trusted by millions. They are your one-stop-shop for all the tools your need to generate, consolidate, and autofill strong and secure passwords for all your accounts, as well as securely share encrypted information directly with anyone. They are an open source password solution for individuals, teams, families and business organizations that can be both cloud or self hosted.

Canary

High Fidelity Honeypots

Thinkst Canary is a deception technology that augments security programs with high fidelity detection points that can be spread across different environments. Deployed within minutes, these birds are configured throughout your network and can be hardware, virtual, or cloud-based. In a nutshell, Canary helps you detect breaches before you become a news headline.

Cavelo

IT Security & Data Discovery

How can your business protect its data when it doesn't know where it is? Cavelo helps businesses proactively reduce cybersecurity risks and achieve compliance with automated data discovery, classification and reporting. Its cloud compatible data protection platform continuously scans, identifies, classifies and reports on sensitive data across the organization & cloud, simplifying compliance reporting and risk remediation.

2. But wait... there's more

Extreme Networks Network Management

Extreme Networks, Inc. provides end-to-end cloud driven networking solutions that enable effortless connectivity for your business and personal use. They push the boundaries of technology by leveraging the powers of machine learning, artificial intelligence, analytics, and automation, allowing for greater levels of network control, assurance, and insights.

Scale Computing Edge Computing

Scale Computing is a leader in edge computing, virtualization, and hyper-converged solutions for customers around the globe. They eliminate the need for traditional virtualization software, disaster recovery software, servers, and shared storage, replacing these with a fully integrated, highly available system for running applications.

SignalWire Remote Collaboration Tool

SignalWire is an API and Products platform bringing broadcast and enterprise grade communications to business around the globe. This includes remote collaboration tools (virtual offices and individual meeting rooms) and interactive online events with SignalWire Work and SignalWire Events.

Turnium Aggregated Network Solution

Turnium is a transformative solution that enables bi-directional aggregation of multiple Internet connections for redundancy and higher bandwidth without the complexity of traditional WAN devices. This is done by binding multiple Internet connections into one for increased reliability, security and performance.
